Itch Level: 6/10

Pain Level: 6/10

Bleeding or Pus: Occasional

Sun Exposure: N/A

Cosmetic Use: ntg

New Product Use: ntg

Work Exposure: ntg

Allergies: ntg

Past Skin Conditions: ntg

Family History: ntg

Medications Used: ntg

Lesion Type: macule

Lesion Color: red

Lesion Shape: round

Lesion Border: sharp

Lesion Texture: smooth

Associated Features: N/A

Patient Notes: N/A

Recommended Products

Benzoyl Peroxide: Found in cleansers, creams, and gels (e.g., PanOxyl, Clearasil). It works by killing acne-causing bacteria and helping to unclog pores. * Ø=Ý9 Salicylic Acid: Commonly used in cleansers, toners, and spot treatments (e.g., Neutrogena Oil-Free Acne Wash, Paula's Choice BHA). It helps exfoliate the skin and dissolve pore-clogging debris. * Ø=Ý9 Topical Retinoids: Such as Adapalene (e.g., Differin Gel, La Roche-Posay Effaclar Adapalene Gel). These Vitamin A derivatives help to regulate skin cell turnover, preventing new breakouts and improving skin texture. * Ø=Ý9 Azelaic Acid: Available in various creams and gels (e.g., The Ordinary Azelaic Acid Suspension). It reduces inflammation, kills bacteria, and helps to unclog pores. *

Doctor Notes
